

## First Aid Risk Assessment

Review Date: Feb 2018

### **Uses of the Village Club, By Whom**

Kingsclere Village Club is a community centre that is run by a committee of part-time volunteer trustees and is rented out to members of the public on an unstaffed basis. The village club runs some learning and leisure classes, and uses teachers contracted on a term by term basis to deliver them. Some organisations lease or rent the building and therefore have their own employees present and visitors on the premises. Others users of the village club are contractors, visitors and volunteers who help to maintain the building and gardens. As the building is used for learning and leisure, it is acknowledged that many users may not have health and safety in the forefront of their minds when using the premises.

### **Nature and Frequency of Incidents**

There have been no reported injuries or incidents in the last 5 years.

### **First Aid Risk Assessment Purpose**

Kingsclere Village Club is not an employer and as such is not subject to the full weight of the statutory provisions, including the need to have a first aid risk assessment. However it recognises that having a pro-active approach to health and safety is in the best interests of the charity.

This risk assessment supplements the overarching Kingsclere Village Club Premises Risk Assessment. That risk assessment primarily focusses upon the safety of the premises as well as equipment and substances provided. This Risk assessment ensures that the first aid equipment provided remains relevant and suitable to the changing uses of the building.

	<b>What are the hazards</b>	<b>Who might be</b>	<b>What are we already doing</b>	<b>What further action is needed</b>	<b>Action by Action</b>
